

mobile

full
first
screen

this could be at the top
but my idea is that is
at very bottom of
screen, scrolls with
page, then 'sticks' to top,
maybe my name fades in
at the left when it
reaches the top

I'm not
sure about
this 'About'
heading, I
think it
might just
be better
to continue
more
conversationally

desktop

hi,

my name is

Jim Hanke

and I'm a

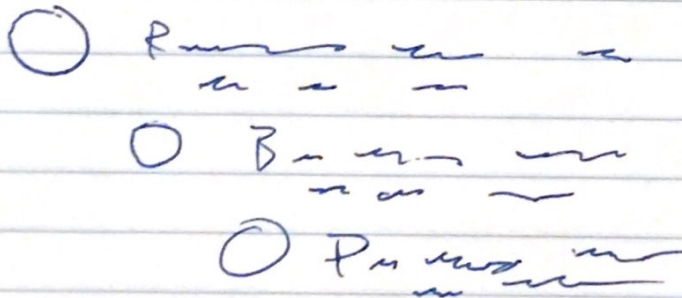

full stack
developer

email linkedin github

still laid out in one
scrollable page

a logo-
like,
cartoonized
version of
my face
maybe
something
I could have
done through
Fiverr?

'about'
section

Portfolio
